

***Timmy Failure: Mistakes Were Made* by Stephan Pastis**

This book is about a boy named Timmy and his pet polar bear, Total. As the owner of Total Failure Inc., Timmy tries to solve cases with his pet. It is funny because Timmy always thinks he solves the case even though he never does.

Most of the cases he investigates have a spice of adventure, like the case of Molly's super-fancy stolen shoes and the case in which Timmy tries to solve the mystery of which nasty person toilet-papered his friend Rollo's house.

While Timmy is solving cases, he imagines weird things. One time, he imagines what a human flower parade might look like. Another time, he imagines that a wonky-looking sculpture is really a monkey throwing a chicken. He also imagines himself and Rollo as tangerine people.

I would recommend this book because it's funny, adventurous, and you always want to find out what happens next to Timmy and Total. The best adventure of all is when poor Total is shipped to the zoo. Will Timmy and Total ever be together again? Read this book to find out.
